Small Data Garden delivers IOTSU® sensor solutions with long battery life, reliable connectivity and Nordic quality with a strong focus on service and care.

We specialise in LoRaWAN and NB-IoT / LTE-M IoT device solutions.

IOTSU® solutions are suitable for schools and kindergartens, as well as commercial and residential buildings.

Built for distributors, service providers and customers:

- We are available to support you.
- Select what you need from compact plug-and-play devices to versatile multifunction device solutions.
- More battery capacity than other solutions.
- Configurations to meet your needs.
- Solutions for integration to automation and control.

Examples where we helped our customers:

Precisely right multifunction device to hit customer need.

Fast and flexible deliveries directly to installation sites.

We took care of device configuration for the customer.

Connectivity was included to the device delivery.

Integration support prevented delays in commissioning.

Increased data frequency when needed.

Near real-time downlinks enabled control.

The desired solution was configured at our factory.

10+ Years of Experience
in IoT Solutions

Small Data Garden is based in the Nordics. Our devices are designed and manufactured here for reliability and support. We operate with the transparency and reliability expected in B2B relationships.
